

DISCOVER ALL
ABOUT THEO

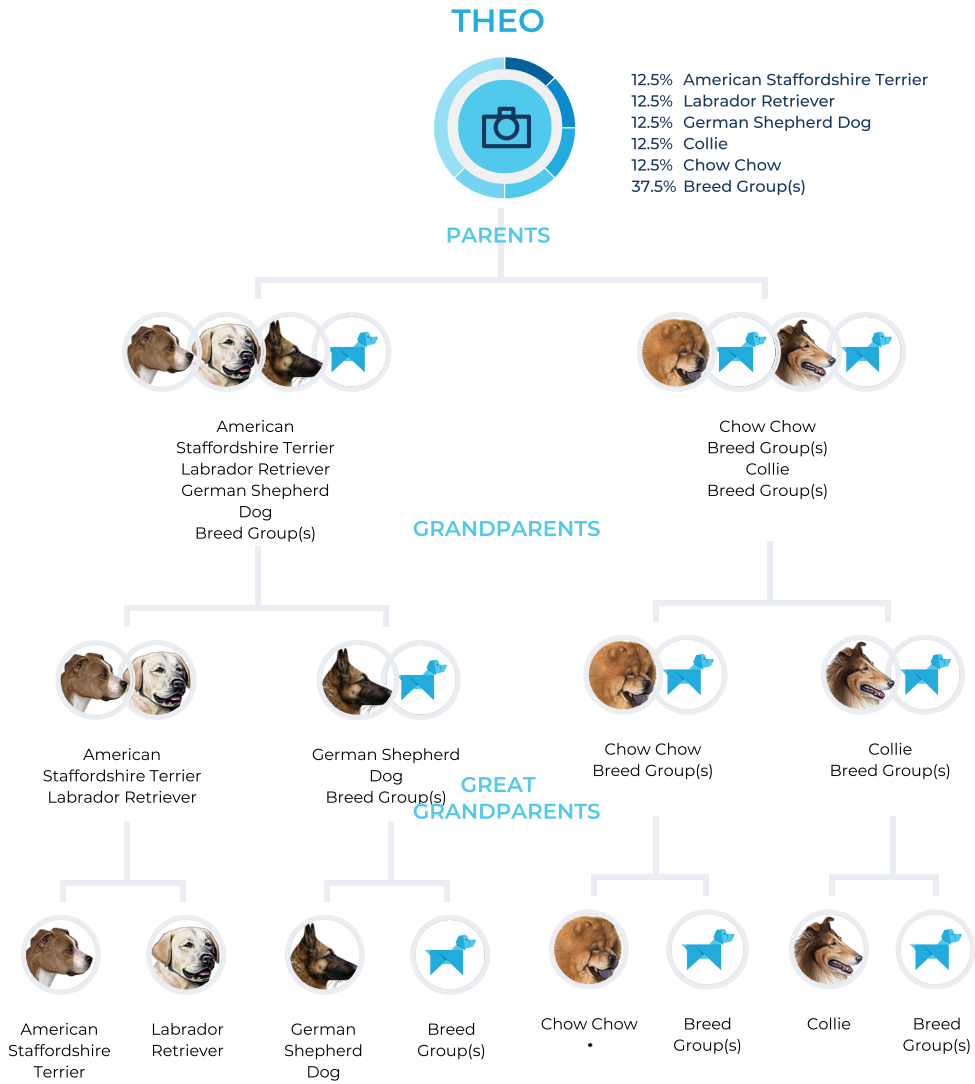

The results are in! Let's take a look at what the DNA told us about Theo's ancestry...

THEO'S BREED BY PERCENTAGE

Exciting news, the results are in! Here's what makes Theo so unique. Using the data generated from Theo's DNA, our sophisticated computer algorithm performed over 17 million calculations! What you see here is Theo's ancestry by percentage.

THEO'S FAMILY TREE

* This particular ancestor's breed has been detected, however at a lesser contribution. This suggests the breed is likely present further back in the ancestry.

THEO'S HEALTH RESULTS

We have tested Theo's DNA for the following important genetic health conditions. The results can be seen below.

MULTIDRUG SENSITIVITY (MDR1) AT RISK

Theo has one copy of the MDR1 mutation, and may be at risk of adverse side effects to some commonly used drugs. Please share these results with your veterinarian.

EXERCISE-INDUCED COLLAPSE (EIC) CLEAR

Theo has no copies of the EIC mutation and should not be affected by the disorder due to this genetic cause.

IDEAL WEIGHT

Based on our findings, we've calculated that Theo's ideal, adult weight should be:

51 lbs - 77 lbs

Maintaining a healthy weight is a key factor in Theo having a long and healthy life.

WISDOMTM PANEL

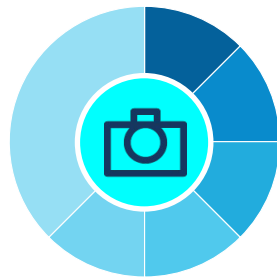

STATEMENT OF AUTHENTICATION

Owner's name: **Rod Allrich**

Dog's name: **Theo**

Date: **May 25, 2018**

This certifies the authenticity of Theo's canine genetic background as determined, following the careful analysis of more than 1800 genetic markers, by the WISDOM PANELTM Canine DNA Test. The purebred breed signature matches included in the analysis are those that were detected in the last three generations of Theo's ancestry using the Wisdom Health proprietary breed detection algorithm.

- 12.5% American Staffordshire Terrier
- 12.5% Labrador Retriever
- 12.5% German Shepherd Dog
- 12.5% Collie
